

Amendment to the abstract.

IN THE ABSTRACT

Please replace the abstract as follows:

**SYSTEM AND METHOD FOR THE MANAGEMENT OF SERVICE QUALITY
INFORMATION IN WEB SERVICES**

A selection criterion appropriate for searching for a web service in UDDI. A provider that provides web services collects result information, which will be used to judge the quality of provided web services, and sends the information to a UDDI site). The UDDI site manages this result information and, in response to a web service search request from a requestor, returns a searched web service and result information on the web service.
